Web sensor - remote thermometer hygrometer with Ethernet interface. Weather sensor for environment monitoring.

code: T3511

Ambient temperature, relative humidity t-line Web sensor. Remote alarm.

Web Sensor with relative humidity and temperature probe. The device is supplied with T+RH probe on the cable.

High precision capacitive polymer sensor ensures excellent long term calibration stability and ultimate accuracy. Dual line LCD is an advantage. Measured values are also converted to other humidity interpretation: dew point temperature, absolute humidity, specific humidity, mixing ratio and specific enthalpy.

The device is supplied with T+RH probe with 1 metr cable.

Processing and analysis of measured data:

- online in COMET Cloud
- COMET Database software
- integration into 3-party systems

With a newly purchased WebSensor with Ethernet communication, you receive 3 months of COMET Cloud. for free; a full year of operation in COMET Cloud. then requires 1 credit.
